

DATASHEET

Silo Citation

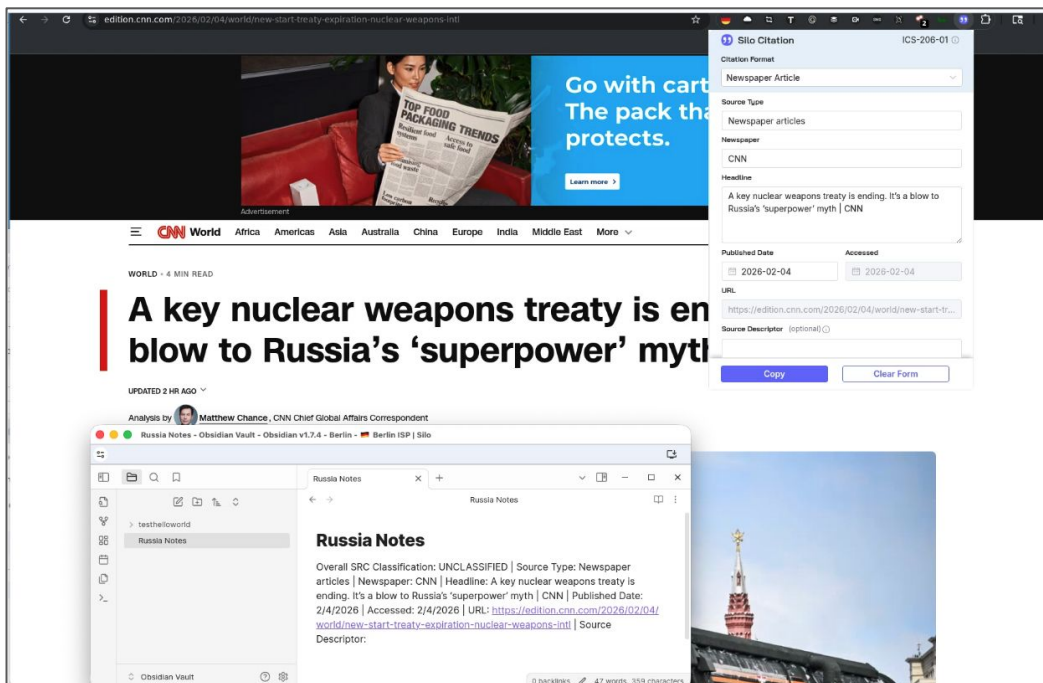

Built for Investigators. Starting with Government OSINT.

Citing sources is one of the most tedious parts of any investigation. Analysts find the information they need, then spend valuable time manually formatting attribution — pulling them out of research flow and adding friction to every report.

For government OSINT teams, it's even harder. The ICS-206-01 standard requires precise, source-specific formatting across 11 different schema types. Generic citation tools like Zotero or EndNote don't support it. Until now, ICS-206-01 citation has been entirely manual.

Silo Citation is a Silo Workspace extension purpose-built for investigators. It works directly in the browser, instantly extracting source details from webpages and generating properly formatted citations in seconds.

Two clicks. Review if needed. Paste into your report. Done.

If you have Silo Extensions enabled, [Silo Citation \(OSINT Citation Manager\)](#) is available to install from the Chrome Web Store.

Ready to modernize your investigation workspace? Schedule a [demo](#) today.

Silo Workspace is the digital investigation platform that protects, masks, and accelerates direct engagement at the source. With isolated multi-app workspaces, a global managed attribution network, integrated capture and analysis tooling, and enterprise-grade controls, Silo is your unified workspace to enter the threat environment.
