

# Silo Drive

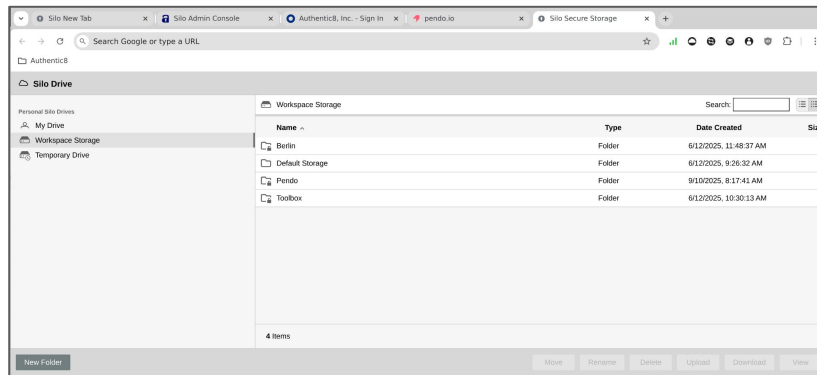

## Shared Storage for Silo Workspace

Analysts need to collaborate with their peers — be it with a single team in the same office, a team distributed across the country or world or one that is working from home. Day in and day out, they collect large amounts of data as they research, including files, documents, code and screenshots. The ability to share findings or seek peer input on this research can drive down time-to-insight for the organization. The challenge is how to enable them to collaborate safely, securely and efficiently. Some assets may be toxic; all need to remain private and secure; and compliance requires you to maintain an audit trail.

### The solution

Silo Drive for Silo Workspace delivers collaboration from within the online investigation platform you already know. An analyst can research anonymously; capture and download an asset for investigation; analyze and annotate the asset; and then share their findings with peers within Silo.

- Silo Drive is maintained in the Authentic8 cloud, isolating potentially harmful assets from your network
- Silo Drive is easily provisioned from within the admin console to groups of users
- All stored assets your team shares are encrypted

### Use case examples

- Multiple analysts collect OSINT on the same target
- SOC is alerted to a phishing email with an attachment, downloads via Silo and notifies CTI team
- Fraud investigation involves analysts in multiple countries who collect/share case notes centrally
- Recurring content collection accessible by the team for analysis and comment

Ready to modernize your investigation workspace? Schedule a [demo](#) today.

**Silo Workspace** is the digital investigation platform that protects, masks, and accelerates direct engagement at the source. With isolated multi-app workspaces, a global managed attribution network, integrated capture and analysis tooling, and enterprise-grade controls, Silo is your unified workspace to enter the threat environment.
